

Call for experts

Building momentum for the long-term CCS deployment in the CEE region

Context

The *Building momentum for the long-term CCS deployment in the CEE region* project, conducted under the EEA and Norway Grants Fund for Regional Cooperation, aims to renew the discussion on the **long-term deployment of carbon capture and storage (CCS) technologies in the Central and Eastern European (CEE) region**, leading to the new policies and joint projects. It is expected that building evidence-based consensus among key stakeholders will pave the way to implement concrete policies and ventures to facilitate the deployment of CCS in the region.

During the third and last phase of the project (Work Package 5), project partners are implementing **networking and capacity-building activities for CCS deployment** for the following countries: Croatia, Czechia, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Slovenia and Ukraine. The output of this work will contribute to translating the findings of Work Package 3 (assessment of current context and opportunities for CCS deployment) and Work Package 4 (roadmap for CCS deployment) provide input into concrete actions for advancing CCS in the above countries.

Description of the assignment

Energy Policy Group is looking for experts from Hungary to implement networking and capacity-building activities for CCS deployment in Hungary. In particular, experts would build on the national report on the context and opportunities for CCS in Hungary (an output of Work Package 3, which will be sent to selected experts upon confirmation of their assignment) and the national roadmap for CCS deployment in Hungary (an output of Work Package 4, which will be sent to selected experts upon confirmation of their assignment) to disseminate the findings of the project and engage the relevant actors in order to advance CCS deployment in Hungary.

The main tasks of the expert are as follows:

- Write and publish a **summary** of the main project findings for Hungary, following guidance from Energy Policy Group;
- Conduct **networking and capacity-building activities** for relevant stakeholders, including two national expert workshops, following guidance from Energy Policy Group;
- Participate in **external activities and events** of the CCS4CEE project, following guidance from Energy Policy Group.

If restrictions around the Covid-19 pandemic apply at any time, the networking and capacity-building activities may be conducted online, following discussion with Energy Policy Group.

The networking and capacity-building activities should contribute to achieving **a minimum of two** key outcomes of the CCS4CEE project. These include official involvement in the legislative process or

consultations, bilateral meetings with representatives of national authorities, facilitation of national, regional or transnational initiatives on CCS, initiation of external events, agreement between implementation bodies in multiple countries on initiating CCS actions, suggestions and proposals from stakeholders on CCS initiatives, and letters of intent from different target groups on developing transnational pilot projects on CCS.

Each selected expert will receive detailed templates for all required written outputs, as well as **guidance for conducting all networking and capacity-building activities**. Draft written outputs and the design of activities will be reviewed internally by Energy Policy Group and the experts will be expected to consider this feedback. The experts will actively participate in associated webinars and events, in addition to those organized by them in Hungary. Moreover, each expert will be a national contact point for Energy Policy Group, WiseEuropa (the CCS4CEE project coordinators) and Bellona Foundation (the CCS4CEE expert partners).

We are open to applications from individual people, groups of people as well as institutions – for collective applications, the overall experience in the CVs sent will be assessed. **Please ensure that you include all experts who will be contributing to this task.**

Indicative timeline of the assignment

01 October 2022 – 30th September 2023

Please note that the indicated period includes the finalization of all above activities, including any relevant feedback rounds with Energy Policy Group.

Indicative budget for the assignment

Based on the workload and depending on expert's experience, the contract is estimated to amount **up to 9 000 EUR** (gross, including all applicable taxes and contributions¹).

Expert selection process

Please send your CV and price offer, as well as brief note outlining your suitability for the role, AS SOON AS POSSIBLE and no later than September 25th to luciana.miu@enpg.ro. Applications will be assessed on a first come, first served basis. We may organize a call to further discuss the assignment and your suitability for the role. Upon selection of the expert, Energy Policy Group will send any relevant templates and instructions for delivery of the above tasks.

The final selection of experts will be made according to the following criteria:

- 30% - proposed price;

¹ Please note that if your organization is VAT registered, the contract value (maximum 9 000 EUR) is also inclusive of any payable VAT by your organization.
